There's a reason why Hollywood relies so heavily on sequels — it shows them the money.

Out of the top 60 box office films since 2016 (excluding 2020, as most theaters were shut down due to the pandemic) just five can be classified as true original titles, with sequels driving the bulk of the industry's highest-grossing films.

OpenAI has asked a federal judge to dismiss parts of the New York Times' copyright lawsuit against it, arguing that the newspaper "hacked" its chatbot ChatGPT and other artificial-intelligence systems to generate misleading evidence for the case.

OpenAI said in a filing in Manhattan federal court that the Times caused the technology to reproduce its material through "deceptive prompts that blatantly violate OpenAI's terms of use."
